Dashboard Performance Analytics Business Year 2020 - 2023

I am Data Science student at Telkom University with a strong interest in data analysis and business insights. I have experience working with data processing, SQL, and data visualization to transform raw data into meaningful insights.

Through academic projects, I have worked on analyzing business performance, building dashboards, and applying analytical thinking to solve real-world problems. I am particularly interested in leveraging data to support decision-making and improve business strategies.

I am currently seeking opportunities to further develop my skills in data analytics and gain hands-on experience in real industry environments.

Project Background

Project ini bertujuan untuk menganalisis performa bisnis Kimia Farma pada tahun 2020–2023 dengan memanfaatkan data transaksi, produk, inventory, dan cabang.

Problem Statement:

- Bagaimana tren penjualan dan profit dari tahun ke tahun?
- Provinsi mana yang memiliki performa terbaik?
- Cabang mana yang memiliki rating tinggi namun transaksi rendah?
- Bagaimana distribusi profit di seluruh Indonesia?
